FOREWORD

The 4th International Ferro-Alloys Congress - INFACON 86 - held in Rio de Janeiro, Brazil, from August 31st to September 3rd, 1986 accomplished its main announced proposal:

"to convene the members of the ferro-alloys industry from around the world to review achievements, analyse current trends and to look into the future searching for ways and means to assure prosperity for the industry."

The Organizing Committee aiming to reach this objective delivered to all Participants, at the Congress Opening, a volume of the Proceedings with 500 pages, containing the text of 37 papers, as well as previous copies of two other papers.

With the registration of 503 Participants, coming from 33 countries from the five continents those papers were presented and debated during the ten Technical Sessions.

This Supplementary Volume contains the INFACON 86 Opening and Closing Addresses, the discussions of all Technical Sessions, the two papers not included in the preceding volume, "The Ferro-Alloy Market Perspective" Panel Presentations and the List of Participants with their respective addresses.

With this volume, the INFACON 86 Organizing Committee concludes its operational purpose presenting to the ferro-alloys segment one additional document containing information of interest for all concerned in the area.
