

Overall Proceedings Contents

INFACON Nine Contents	5
Opening Ceremony & Plenary Sessions	14
Simulation Control Modeling	70
Ferrochromium & Ferronickel	136
Ferromanganese & Silicomanganese #1	200
Silicon & Ferrosilicon #1	244
Ferromanganese & Silicomanganese #2	278
Silicon & Ferrosilicon #2	314
Ferromanganese & Silicomanganese #3	358
Environment	428
Electrodes & Refractory	462
Health & Safety	522
Global Updates	542
Closing Plenary Session	554
 Manganese Symposium Contents	 10
Opening Session	586
Mechanisms of Toxicity	592
Pharmakokinetics & Miscellaneous Papers	602
Human Health & Epidemiology Parts I & II	612
Manganese and the Nervous System	624

INFACON Nine Contents

JUNE 4 8:00-8:30 OPENING CEREMONY	14
Welcome to INFACON Nine	
Dieter Ksinsik: INFACON Nine Chairman	
Welcome from The Ferroalloys Association	
Edward J. Kinghorn, Jr.: TFA President	
Welcome from Quebec	
Quebec Government Official	
JUNE 4 8:30-10:00 PLENARY SESSION	
Outlook from the Steel Industry	
Duane R. Dunham: Chairman, President and CEO of Bethlehem Steel	
Outlook from the Silicones Industry	
Gary Anderson: President and CEO of Dow Corning	
Manganese Outlook and Symposium Overview	16
Jose Antonio Rivero: Minera Autlan - Chairman of the International Manganese Institute	
Restructure of Chinese Ferroalloy Industry	23
Zhang Zengchan: Secretary General of the Chinese Ferroalloy Industry Association	
JUNE 4 10:30-12:30 PLENARY SESSION	
Trends in U.S. Customer Needs for Ferroalloys	29
Scott Sibley, John W. Blossom, Larry D. Cunningham, Michael D. Fenton, Joseph Gambogi, Thomas S. Jones, Peter H. Kuck, John F. Papp, Robert G. Reese, and Kim B. Shedd: U.S. Geological Survey	
Key Developments in the Ferroalloy Markets	59
Jorn P. De Linde: CRU International	
The Internet and Emerging Communication Technologies	
Lisa Riceman: Arthur Anderson	
The Ferroalloy Industry and Global Climate Change: Risk Minimization and Economic Opportunity	65
Michael Mondshine, SAIC	
JUNE 4 14:00-17:30 BREAKOUT - SIMULATION CONTROL MODELING	70
Determination of Component Activities in the Cr-Si-C and Cr-Fe-Si-C Melts	72
K. Kossyrev: Moscow Steel and Alloys Institute, K. Maruchkin and A.S. Alikhanyan: Kurnakov Institute of Inorganic Chemistry, and S.E. Olsen: Norwegian University Science & Technology	
DC Arc Furnace Technology Applied to Smelting Applications	80
Kjell Bergman and Björn Kjellberg: Danieli CentroMet	
Flow and Heat Transfer in a Radially Spreading Liquid Metal Jet Related to Casting of Ferroalloys	90
Harald Haaland: Elkem Shared Services and Jon Arne Bakken: Norwegian University of Science & Technology	
Experiences in Operation of Various Electric-Arc Furnaces under Resistance Control	103
A.L. Moolman, M.S. Rennie, and P. Brereton-Stiles: Mintek	
Information Management in the Ferroalloy Business	108
M.S. Rennie, W.D. Carew, R. Terblanche, A.L. Moolman, and N. Anthony: Mintek	
A Thermodynamic Model for Silicon Furnace	116
X. de la Jugannière, Pèchiney Electrometallurgie	

Discussion of Ideal Smelting Model of Submerged-Arc Furnace	121
Li Jingchun: Jilin Ferroalloy Group Co. Ltd.	
The Related Practices for the Design for Low Frequency Electric Arc Furnace	131
Li Zhichao: Xi'an Huaxing: Electric Furnace Co. Ltd.	
JUNE 4 14:00-17:30 BREAKOUT - FERROCHROMIUM AND FERRONICKEL	136
Reduction of Chromium Oxide by Methane-containing Gas	138
O. Ostrovski and Nathaniel Anacleto: University of New South Wales, Andrew Jacobs: BHP Steel, and Gregory McKenzie: BHP Research	
Kinetic Modelling of Chromite Pellet Reduction with Co Gas Under Rising Temperatures from 700 to 1520 Degrees C	147
Yanping Xiao and Markus Reuter: Delft University of Technology, and Lauri Holappa: Helsinki University of Technology	
Kinetic Study on Smelting Reduction of Chromite Ore	157
Marko Kekkonen and Lauri Holappa: Helsinki University of Technology, and Pekka Niemelä: AvestaPolarit Chrome Oy	
Excavation of a 54 MVA HC-Ferrochromium Furnace	166
Eli Ringdalen and Johan Eilertsen: Elkem Rana As	
Status Report on Pyrometallurgical Ferronickel Production	174
G. Rath, J. Kunze, and R. Degal: SMS-DEMAG AG	
Pig-Iron and Ferroalloys Production in Oxygen Reactor	189
V.A. Grigoryan, A.V. Pavlov, A.E. Semin, and K.L. Kossyrev: Moscow Steel and Alloys Institute	
Probe into Decreasing Sulphur Contents in Medium Ferrochromium in Converter Practice	192
Weng Hongbin and Li Pengyun: Zhengjiang Hengshan Ferroalloy Works	
JUNE 5 8:00-10:30 BREAKOUT - FERROMANGANESE AND SILICOMANGANESE #1	200
Kinetics of the Prereduction of Manganese Ores	202
Merete Tangstad, Stein Wasbø and Ragnar Tronstad: Eramet Norway R&D and Michel Sibony: Centre de Recherche de Trappes	
Sintering of COMILOG Ore in Moanda	208
JJ Dailoux: Eramet Comilog Manganese SA; M. Sibony and F. Wasser: CRT	
Sintered Manganese Ore and its Use in Ferromanganese Production	212
Jorma Daavittila, Päivi Oikarinen: Outokumpu Engineering Contractors Oy; and Riku Sarkkinen and Helge Krogerus: Outokumpu Research Oy	
Kinetics of Gaseous Reduction of Manganese Ore	223
Tor Lindstad: SINTEF Materials Technology and Lars-Arne Stalheim: Norwegian University of Science and Technology	
Metallthermic Reduction of Tavas Manganese Ore	230
Onuralp Yücel, Alper Ozan Keskin, and Filiz Çinar Şahin: Istanbul Technical University	
High Thermal Electrical Property of Manganese Ore in Production of High Carbon Ferromanganese	236
Yoshihiro Miyauchi, Masashi Mochida, and Yasunari Fuchi: Nippon Denko Co.	
JUNE 5 8:30-10:30 BREAKOUT - SILICON AND FERROSILICON #1	244
The Worldwide Silicon Market and New Technologies	246
Javier Bullón Camarasa and Santiago Oller Velasco: Ferroatlántica S.L.	
Arc Simulation Model for Three-Phase Electro-metallurgical furnaces	253
G.A. Sævarsdottir, J.A. Bakken, V.G. Sevastyanenko, Liping Gu: Norwegian University of Science and Technology	

The SKTEC Electrode – An Adaptable Electrode Design for the Production of Silicon Metal and Ferrosilicon	264
Rene Boisvert: Bécancour Silicon	
Use of Biocarbon in Norwegian Ferroalloy Production	268
Bodil Monsen and Morten Grønli: SINTEF; Lars Nygaard: FESIL ASA; and Halvard Tveit, ELKEM ASA	
JUNE 5 11:00-13:00 BREAKOUT - FERROMANGANESE AND SILICOMANGANESE #2	278
The Slag Basicity Concept in the HC FeMn Process	280
S.E. Olsen: Norwegian University of Science & Technology	
Effect of Gas Composition on the Carbothermic Reduction of Manganese Ore and Ferromanganese Slag	286
M. Yastreboff and Oleg Ostrovski: University of New South Wales; and S. Ganguly: Tasmanian Electrometallurgical Company	
Factors Affecting Carbon Consumption in the Production of High Carbon Ferromanganese	293
K.N. Swamy and D.G.C. Robertson: University of Missouri-Rolla; and P. Calvert and D. Kozak: Eramet Marietta, Inc.	
Kinetic Modelling of MnO Reduction from Manganese Ore	302
Oleg Ostrovski and M. Yastreboff: University of New South Wales; S.E. Olsen: Norwegian University of Science and Technology; and M. Tangstad: Eramet Norway	
JUNE 5 11:00-13:00 BREAKOUT - SILICON AND FERROSILICON #2	314
Modeling of the Silicon Process as a DAE System	316
Martin G. Ruszkowski, and Lorenz T. Biegler: Department of Chemical Engineering; Tor Lindstad: SINTEF Materials Technology; and B. Erik Ydstie	
Oxidation of Liquid Silicon-Reaction Mechanisms and Kinetics	328
Kjetil Hildal and Johan Kr. Tuset: Norwegian University of Science and Technology	
Stream Explosions of Single Drops of Molten Silicon-Rich Alloys	338
L.S. Nelson, P. Brooks, R. Bonazza, and M.L. Corradini: University of Wisconsin, and K. Hildal, and T.H. Bergstrom: SINTEF Materials Technology	
Selectivity and Reactivity of the Trichlorosilane Process	352
Geir J. Andersen and Harald A. Øye: Norwegian University of Science & Technology, NTNU; Jan-Otto Hoel: SINTEF Applied Chemistry; and Harry Rong: Elkem ASA	
JUNE 5 14:30-17:30 BREAKOUT - FERROMANGANESE AND SILICOMANGANESE #3	358
Mineralogical and Thermodynamic Investigation of CLU Converter Lining Failures in Commercial Production of Medium Carbon FeMn	360
Lloyd R. Nelson: Tubatse Ferrochrome, Samancor Chrome; PHF Bouwer: Transalloys; and Natalie B. Buenk: Ferrovel	
The Binary Diagrams within the System Fe-Mn-C-O, and the Thermal Properties of Elemental Manganese	377
J. Fenstad and J.K. Tuset: Norwegian University of Science & Technology	
The Processing of Jigged Ferromanganese Fines in a DC Arc Furnace	388
K. Bisaka and G. M. Denton: MINTEK; and J.A.L. Parker: Titaco	
SiMn Production in a 150 KVA Pilot Scale Furnace	401
M. Tangstad, B. Heiland, and R. Trondstad: Eramet Norway R&D; and S.E. Olsen: NTNU	
The Production of Purified Mn-Si Alloy	407
Ye Yunfeng and Dong Ying: Jilin Ferroalloys Corp.	

JUNE 6 9:30-10:30 BREAKOUT - GLOBAL UPDATES	542
The Present Situation of Ferroalloy Production and Consumption in Turkey	544
Süheyla Aydın, Onuralp Yücel, Cuneyt Arslan, and Akin Koksak: Istanbul Technical University	
A Survey of the Iranian Ferroalloy Industry	550
D. Sargheini: The Ministry of Mines and Metals; .S Heshmati-Manesh and A. Ataie: Tehran University	
 JUNE 6 11:00-13:00 PLENARY SESSION	 554
A New Role for Microalloyed Steels Adding Economic Value	556
Michael Korchynsky: U.S. Vanadium Corporation	
Aluminum-based Solutions for the Automotive Industry	
Don Macmillan, President of Alcan Automotive Products	
The Future Role of Ferroalloys in Iron and Steel	562
Øystein Grong: NTNU; Pär Jönsson: Department of Metallurgy, KTH; and Ole-Svein Klevan: Elkem ASA, c/o Elkem Thamshavn	
Future Demands on Ferroalloys from the Customers in the Steel Industry	573
Pär Jönsson and Thobias Sjöqvist: Div. of Metallurgy, KTH; and Øystein Grong: Dept. of Materials Technology and Electrochemistry, NTNU	

The Effect of Ferromanganese Cleanness on Inclusions in Steel	411
Thobias Sjöqvist and Pär Jönsson: Royal Institute of Technology; and Halvard Berg: Eramet Norway	
Oxidation Studies During Decarburization of FeMn	421
P. J. Bhonde and R.D. Angal: Indian Institute of Technology	
JUNE 5 14:30-17:00 BREAKOUT - ENVIRONMENT	428
Mercury Removal from Off-gases at Tinfos Manganese Plant, Øye Smelteverk	430
Matts Bruno and Dag Haaland: Tinfos Jernverk AS; and Thomas Thomassen: MILTEC AS	
Bacterial Reduction of Hexavalent Cr: A Viable Environmental Solution to the Treatment of Effluent from a FeCr Smelter	438
Willem A. Gericke: Billiton Centre for Pyrometallurgy	
The Environmental Challenge: the Approach Adopted for the Manufacture of Chromium Metal and FerroTitanium	444
L. Ranson: London & Scandinavian Metallurgical Co Limited	
EuroAlliages Research Project for Environmental Hazard-Evaluation of Ferroalloys and Slags	450
M.B.M. Indeherberg and K. Van Der Kerken: Ecotox Laboratory Lisec; E.G. Astrup: Elkem ASA; G. Humbert: Pechiney; S. Laget: SADACI SA; E. Midgaard: Tinfos Jernverk A/S; I.D. Scott: LSM Co. Ltd.; and U. Syrjälä: Outokumpu	
JUNE 6 830-1030 BREAKOUT - ELECTRODES & REFRACTORY	462
Study on Magnesia Ramming Bottom Lining in Ferroalloy Refining Furnace and Its Application	464
Wang Shouyuan: Jilin Ferroalloys Group Co. Ltd.	
Improving Profitability by Analyzing Ferroalloy Furnace Lining Performance to Improve Lifetime	475
Reinoud J. van Laar, Albert J. Dzermejko, and John M. Risi: Danieli Corus Technical Services; Hugo Höll: Samancor Chrome; and Jacques Malan	
Use of Soderberg Electrode Paste in Briquettes	486
José Paulo M. Amaro, M.Met: Technical Services Carboindustrial S.A.; Geraldo A. Messias Lima: Ferroligas Maringá; and Euclides Jose' Lourenco and Jose' Alcestes Belmonte: Carboindustrial S.A	
Operation of Söderberg Electrodes Methods to Avoid and Solve Electrode Failures	494
Gunnar Andersen, Reidar Innvær and Bjørnar Larsen: Elkem Carbon	
Application of Magnesite Ramming Mix in Production of Ferroalloy	501
Yang Zhizhong: Central Iron and Steel Institute, Wang Shouyuan: Jilin Ferroalloy Co. Ltd., and Jin Yuangang: Huayu Refractories Co. Ltd.	
Impact of Electrode Paste on Soderberg Electrode Performance	510
P.M. Wilkinson, Dr. S. Ganguly, P.A. Williams, and L.J. Jensen: Tasmanian Electro Metallurgical Co. Pty. Ltd.	
JUNE 6 8:30-9:30 BREAKOUT - HEALTH & SAFETY	522
Magnetic Fields from Arc Furnace Considering Occupational Exposure	524
Tommi Keikko, Sampsa Kuusiluoma, and Leena Korpinen: Tampere University of Technology; and Mauri Kauppi: Outokumpu Chrome	
Enquiry into a Fire in the Bag Filter Attached to Two Ferromanganese Furnaces	530
B R Broekman: Avmin Ltd; A R Jamieson: Pyromet; and C G Muir: Feralloys	

Manganese Symposium Contents

JUNE 4 8:00-8:30 OPENING CEREMONY	14
Welcome to INFACON Nine	
Dieter Ksinsik: INFACON Nine Chairman	
Welcome from The Ferroalloys Association	
Edward J. Kinghorn, Jr.: TFA President	
Welcome from Quebec	
Quebec Government Official	
 JUNE 4 8:30-10:00 PLENARY SESSION	
Outlook from the Steel Industry	
Duane R. Dunham: Chairman, President and CEO of Bethlehem Steel	
Outlook from the Silicones Industry	
Gary Anderson: President and CEO of Dow Corning	
Manganese Outlook and Symposium Overview	16
Jose Antonio Rivero: Minera Autlan - Chairman of the International Manganese Institute	
Chinese Ferroalloy Industry into the New Century	23
Zhang Zengchan: Secretary General of the Chinese Ferroalloy Industry Association	
 JUNE 4 10:30-12:30 SESSION 1: OPENING SESSION	586
Open Issues from 15th International Conference on Manganese	
Michael Aschner: Manganese Symposium Technical Chairman	
The Status of MMT at the US EPA	588
J. Michael Davis: US Environmental Protection Agency	
Combustion Products of the MMT Fuel Additive	589
Joseph W. Roos, Donald R. Lynam, Isaac L. Smith, and Gerard D. Pfeifer: Ethyl Corporation; and John G. Reynolds: Lawrence Livermore National Laboratory	
An Overview of CIIT's Manganese Research Program	590
D.C. Dorman, K.A. Brenneman, M.F. Struve, R.A. James, B.E. McManus, and B.A. Wong: Chemical Industry Institute of Toxicology	
 JUNE 4 14:00-17:00 SESSION 2: MECHANISMS OF TOXICITY	592
Effects of Manganese on Oxidative-Stress in CATH.a Cells	594
Michael Aschner, Jeffrey W. Allen, and Cynthia G. Worley: Wake Forest University School of Medicine	
Influx Kinetics of Manganese, Manganese Citrate and Manganese Transferrin into the Brain	595
J.S. Crossgrove, S.S. Rhineheimer, and R.A. Yokel: University of Kentucky Medical Center	
Effects of Manganese on the Developing Rat Brain: Oxidative-Stress Related Endpoints	596
Michael Aschner and Sarah Weber: Wake Forest University School of Medicine, David C. Dorman: Chemical Industry Institute of Toxicology; and Lawrence H. Lash: Wayne State University	
The Uptake of Manganese in Brain Endothelial Cultures	597
Michael Aschner, Jeffrey W. Allen, Gouri Shanker, and Lysette A. Mutkus: Wake Forest University School of Medicine	

Measurements of the Oxidation State of Manganese Inside Brain, Heart, and Liver Mitochondria Using XANES Spectroscopy	598
T.E. Gunter, L. Buntinas, R. Eliseev, S.T. Hammond, A. Alexandrov, and K.K. Gunter: University of Rochester; L.M. Miller: Brookhaven National Laboratory; and C.E. Gavin: Bristol-Meyers Squibb	
Mechanisms of Manganese-Induced Rat Pheochromocytoma (PC12) Cell Death and Cell Differentiation	599
Jerome A. Roth, Li Feng, Jennifer Walowitz, Richard W. Browne, and Michael Garrick: State University of New York, Buffalo	
Disordered Iron Metabolism Following Manganese Exposure: From Systemic Iron Homeostasis to Cellular Iron Regulation	600
W. Zheng: Columbia University	
Neurotoxicity of Inhaled Manganese	601
J. Zayed: University of Montreal	
JUNE 5 8:30 - 10:30 SESSION 3: PHARMACOKINETICS & MISCELLANEOUS PAPERS	602
Influence of Dietary Manganese on the Pharmacokinetics of Inhaled Manganese Sulfate in Male CD Rats	604
Dorman, D.C., Struve, M.F., James, R.A., McManus, B.E., Marshal, M.W., and Wong, B.A.: Chemical Industry Institute of Toxicology	
Particle Solubility and Delivery of Inhaled Manganese to the Rat Brain: Manganese Sulfate and Manganese Tetroxide Pharmacokinetics Following Repeated "Open 14-Day" Exposure	605
Struve, M.F., James, R.A., Marshal, M.W., Parkinson, C.U., Wong, B.A. and Dorman, D.C.: Chemical Industry Institute of Toxicology	
Brain Manganese Efflux through the Blood-Brain Barrier	606
R.A. Yokel, S.S. Rhineheimer, and B.L. Bukaveckas: University of Kentucky Medical Center	
Direct Olfactory Transport of Inhaled Manganese to the Rat Brain: Toxicokinetic Investigations in a Unilateral Nasal Occlusion Model	607
Brenneman, K.A., Wong, B.A., Buccellato, M.A., Costa, E.R., Gross, E.A. and Dorman, D.C.: Chemical Industry Institute of Toxicology	
Where Does the Manganese Come From? Metal Quantities and Associations in Modern Alluvium of the Mississippi River Delta	608
Meilke, Howard, Gonzales, C.R., Powell, E., Sturghill, A.L., and Shah, A.: Xavier University of Louisiana	
Manganese Treatment Induces Dose-Related Decreases in the Activities of Several Glycolytic and TCA Cycle Enzymes in Neuroblastoma and Astrocytoma Cells	609
G.V. Malthankar, B.K. White, D.S. Hanson, C.L. Hanson, A. Bhushan, C.K. Daniels, K.J. Rodnick, and J.C.K. Lai: Idaho State University	
Uptake of Manganese Dioxide to the Rat Brain: Role of Particle Size in a Nose-Only Inhalation Exposure	610
Fechter, L.D., Johnson, D.L., and Lynch, R: University of Oklahoma Health Sciences Center	
JUNE 5 11:00-16:30 SESSION 4&5: HUMAN HEALTH & EPIDEMIOLOGY PART I & II	612
Exposure, Neurobehavioural Performance and Hormone Status of Workers Exposed to Manganese in the Production of Manganese Alloys	614
Dag G. Ellingsen, Rita Bast-Pettersen, Siri Hetland, and Yngvar Thomassen: National Institute of Occupational Health	

Manganese Exposure and Parkinson's Disease: a Comparison Using Two Tremor Characteristics	615
Gabriel Lambert, Anne Beuter, and Brenda MacGibbon: UQAM, Montreal	
Characterization of Workers Exposure in the Production of Manganese Alloys	616
Yngvar Thomassen, Siri Hetland, and Dag G. Ellingsen: National Institute of Occupational Health and Hugo Ortner: Technical University of Darmstadt	
An Investigation of Potential Nervous System Effects of Manganese at a South African Smelting Works	617
Myers, J.E., Thompson, Mary Lou, Young, T., Ramushu, S., Esswein, Naik, I, Iregren, A, Rees, D, London, L	
Biomarkers for Environmental Manganese Exposure: Useful Ranges for Different Exposure Scenarios	618
Myers, J.E., Naik, I, Thompson, Mary Lou, Ramushu, S., Esswein, E.	
Manganese and Prion Disease	619
David R. Brown: University of Cambridge	
Risk Assessment of Manganese in the Development of Prion Diseases	620
Lamoury F, Burel M, Marce D, and Deslys J-P, CEA	
Dopaminergic Dysfunction Following Long-term Occupational Exposure to Manganese	621
Raffn E., Arlien-Søborg P., Thomsen C, Friberg L, Hillerød and Copenhagen	
A Novel TLV for Inorganic Manganese Compounds	622
Karen R. Obenshain, Martha M. Marrapese, and David G. Sarvadi: Keller & Heckman LLP	
JUNE 6 8:30-12:30 SESSION 6: MANGANESE AND THE NERVOUS SYSTEM	624
Effects from Occupational and Environmental Exposure	626
Roberto Lucchini: University of Brescia	
No-observed Adverse Effect Level for Early Psychomotor Dysfunction in Workers Exposed to Manganese Dioxide	628
Harry Roels and Maira I. Ortego: Universite' catholique de Louvain, Edgard Ceulemans and Ross Myerson: Duracell Batteries, Dave K. Verma: McMaster University, and Howard J. Cohen: University of New Haven	
Determination of an Occupational Exposure Guideline for Manganese Using the Benchmark Method	629
Kenny S. Crump and Harvey J. Clewell: ICF Consulting	
A Risk Assessment for Manganese that Considers Its Essentiality	630
Harvey J. Clewell: ICF Consulting and Melvin E. Anderson: Colorado State University	
Is Increasing Environmental Exposure to Manganese Disturbing the Delicate Balance of an Essential Element?	631
Donna Mergler: University du Quebec a Montreal	
A Response Outlining Research Needs Arising from Questions Above	
Michael Aschner: Wake Forest University	
Roundtable with Open Discussion and Indication of Research Needs	
Chairs Host - All Participate
