

TABLE OF CONTENTS

Volume I:

PRODUCTION TECHNOLOGIES AND OPERATION

Presmelting Operations

Agglomeration of refractory chromite ore <i>A.A.Akberdin, A.S. Kim, R.A.Akberdin</i>	1
Methods of manganese ore thermal-treatment prior to smelting – what to choose? <i>Y. Gordon, J. Nell</i>	5
Technical development of ferrosilicon manganese production in ore-smelting electric furnaces with using of manganese magnesia agglomerate <i>V.S.Kutsin, V.I.Olshanskiy, U.B.Dedov, I.Philipov, M.I. Gasik, M.M.Gasik, A.N.Ovcharuk, O.I.Polyakov</i>	17
Use of RADOS XRF sorters: experience at TATA STEEL <i>S. Mohanan, G. Saxena, R. K. Chittapragada, M. Naik, K. Ashok</i>	25

Chromium Alloys Production and Operation

Aspects of DC chromite smelting at MINTEK – an overview (PLENARY) <i>L.J. Geldenhuys</i>	31
Production of low-carbon ferrochrome with the low content of phosphorus using the complex reducer <i>E.N. Akimov, Y.I. Voronov, A.V. Senin, V.E. Roshchin</i>	49
New process for sintering chromite concentrate with continuous-strand sinter machine <i>H. Wang, X. Wang, Y. Lang, S. Chu</i>	57
Granulation of ferroalloys – results from industrial operations and comparative study on fines generation <i>P. Vesterberg, K. Beskow, C-J Rick</i>	65
Cliffs chromite – a North American integrated producer <i>M. H. Cramer</i>	73
Ferrochrome production in Albania <i>H. Mueller, A.Vangjeli, R. Lurf, C. Redl</i>	81
Physicochemical features of chromite elements reduction kinetics in ferro-alloy electric furnaces <i>O. V. Zayakin, V. I. Zhuchkov, V.I. Afanasiev, A.V. Dolmatov</i>	89
Ferrosilicon chrome production technology/practices' effect on the quality of low carbon ferrochrome <i>J. Chirasha</i>	97

A process for the recovery of chromium and iron oxide in high carbon ferrochrome slag to obtain chromium and iron in the form of saleable metal <i>C.N. Harman</i>	103
Adjustment of high carbon ferrochrome composition in DC furnaces <i>O. Privalov, Ye. Abdulabekov, Zh. Nurmukhanbetov, M. Kospanov, Zh. Mussabekov</i>	109
Properties of chromite ores from Ferbasa and their effect on Cr-losses to slag during HCFerCr production at Ferbasa <i>E. Ringdalen, M. Rocha, J. R. Neto, T. Malvik</i>	115
Manganese Alloys Production and Operation	
The thermal diffusivity of raw materials for ferromanganese production <i>M. Ksiazek, T. Manik, M. Tangstad, E. Ringdalen</i>	127
Melting and reduction of manganese sinter and pellets <i>T. Brynjulfsen, M. Tangstad</i>	137
Operational improvement of a submerged arc furnace in Kashima works (KF-1) <i>H. Takahashi, K. Ichihara, T. Homma</i>	149
Extraction of manganese from the slag of silicothermal reduction of metallic manganese <i>V.Ya. Dashevskiy, A.A. Aleksandrov, A.G. Kanevskiy, L.I. Leontiev</i>	157
Improved safety for manganese alloy smelting <i>P.A. Eidem, K.A. Egeland, D. Baumann</i>	165
Purity requirements for Mn-alloys for producing high manganese TRIP and TWIP steels <i>J.Safarian, L.Kolbeinsen</i>	175
Agglomeration of charge in ferromanganese submerged arc furnaces <i>D. Slizovskiy, M. Tangstad</i>	185
Study of SiMn production in pilot scale experiments - comparing Carajas sinter and Assmang ore <i>E.Ringdalen, M. Tangstad</i>	195
Manganese ore and alloys piloting tools at Eramet Research <i>G. Nussbaum, A.Amalric, A. Soller</i>	207
Ferronickel Production and Operation	
Electromagnetic level profile measurement system at VALE ONÇA PUMA ferronickel smelter improves safety and enhances process control decision making <i>N. Brogden, P. Jakobsson, P. Bloemer, A. Lyons, C. Doyle, R. Aquino, R. J. Dijkhuis, E. Floch</i>	215
New method to produce FeNi nuggets from low grade ore by semi-molten reduction <i>X. Lu, E. Guo, P. Cheng, Q. Yuan, M. Liu</i>	223

Refining of ferro-nickel <i>C. Redl, M. Pfennig, R. Kristl, S. Fritsch, H. Müller</i>	229
Nickel pig iron production from lateritic nickel ores <i>H. Yildirim, H. Morcali, A. Turan, O. Yucel</i>	237
Desulphurization of crude ferronickel, high sulfur content in ladle furnace <i>F. Hernández, M. Nejarda</i>	245
Ferrosilicon Production and Operation	
Engineered metallurgical silicon (EMS) - an alternative to mechanically milled silicon and a method to recycle wastes <i>A. Weber, L. Parous, V. D.de Oliveira</i>	255
Phase chemistry of digout samples from a ferrosilicon furnace <i>J. Nell, C. Joubert</i>	265
Production of SiO gas in the silicon process <i>S. Bao, M.Tangstad, K. Tang, E. Ringdalen</i>	273
Condensate in the metallurgical silicon process – reaction mechanisms <i>J. Vangskåsen, M. Tangstad</i>	283
Innovative electric smelter solutions of the SMS GROUP for the ferro-alloys and Si-metal industry <i>R. Degel, T. Germershausen, R.Nörthemann, M. Köneke</i>	291
Other Ferro Alloys Production and Operation	
New trends of production of FeSiAl – “Kazakhstanskyi” alloy <i>N. Nazarbaev</i>	307
Prospects of production complex aluminum silicon alloy <i>V.Shkolnik, A.A.Zharmenov, M.Zh.Tolymbekov, S.O.Baisanov, A.F.Chekimbaev</i>	311
Evaluation of physical and chemical properties of charge materials from the point of possibility of receiving the alloy of alumosilicomanganese <i>Ye. Mukhambetgaliyev, S. Baysanov, A. Baysanov, N. Yugay, D. Zhiembaeva, V. Tolokonnikova</i>	317
Boron in production of ferroalloy production <i>A.A. Akberdin, A.S. Kim</i>	325
Innovations in ferro-alloys process technologies <i>T. Germershausen, J. Bader, J. Reichel, U. Gerike</i>	335
Post Taphole Operations	
Implementation of the technology of slag separation at Nikopol ferroalloy plant <i>V.S. Kutsin, V.I. Olshanskiy, U.B. Dedov, M.I. Gasik, A.N. Ovcharuk</i>	347

ENGINEERING ASPECTS and CONCEPTS

Furnace Design and Equipment

- Damage caused by the east Japan earthquake and recovery from this disaster at the Kashima works, Chuo Denki Kogyo CO., LTD
N. Ito, S. Tsukuda, A. Kato, S. Kurihara 355
- The safe and efficient way of cooling: ILTEC – ionic liquid cooling technology
S. Konetschnik, A.S. Filzwieser, I. Filzwieser 369
- Improved furnace cooling water leak detection system at Vale
B. Bussell, J. Janzen M., St.Amant, R. Miron, , M. Emond, W. Braun, T. Gerritsen 377

Lining

- Evaluation of HCFeMn and SiMn slag taphole performance using CFD and thermochemical property modeling for CaO-MnO-SiO₂-Al₂O₃-MgO slag
J. Muller, J.D. Steenkamp 385
- Magnesia-carbon refractory lining for ferronickel converters - optimization and lining improvement at NEWCO FERRONIKELI (Cosovo)
T. Schemmel, L. Schade, P. Kouzoupis, F. Beqiri 393
- Improved furnace lining performance at YIWANG ferroalloys
P. O'Shaughnessy, D. Wei, Kang Guoxhu, P. Sylven 401

Design and Control

- Ferroalloy off-gas systems: from design to implementation and design verification process
P. Roberts, L. Els, S. Noakes, B. de Montard 407
- Development of a camera-based Söderberg electrode slip measurement device
D. T. Jordan, C. J. Hockaday 417
- Developments in advanced furnace control
S. Strydom, I. McDougall 427
- Design of direct current furnace power 6.4 MW for silicon reducing.
Electrodes and refractory work, control regimes and summary of manufacturing
S. Nekhamin 435

Electrodes and Control

- Circulating currents in the delta connection, feasibility of skew tapping in the operation of submerged-arc furnaces
G. Saevarsdottir, P. Manolescu, T. Magnússon, K. Sigurjonsson 443
- Minimizing thermal stress during shutdown of Söderberg electrodes
B. Larsen, H. Feldborg, S.A. Halvorsen 453

FUNDAMENTALS, THEORY

Reductants

- Possible use of natural gas for silicon or ferrosilicon production
B.Monsen, L.Kolbeinsen, S.Prytz, V.Myrvågnes, K. Tang 467
- Reducibility and electric resistance of carbonaceous materials within ferroalloy smelting processes
Zh. Nurmukhanbetov, O.Privalov, L.Prokopyev 479
- Strength, micro-strength and microstructure of carbonaceous materials
X. Xing, G. Zhang, G. Ciezki, M. Dell'Amico, O. Ostrovski 489
- Research of reducing ability of carbon reductants for ferroalloy production by dilatometric method
A.V.Pavlov, A.S.Kazakov, O.V.Chadaeva, Y.V.Shurigina 499
- Production of special kinds of carbonaceous reducing agents for ferroalloy smelting
S.G. Grischenko, M.I. Gasik, A.N.Ovcharuk, Yu.V. Filatov, M.Ya. Garsht 505
- Effect of coke's texture on electrical behavior
A.Heikkilä, J. Pussinen, O. Mattila, T. Fabritius 511
- Carbon reductant for silicon metal production
V.Kim, M.Tolymbekov, S.Kim, G. Ulyeva, S.Kudarinov 519

Chromium Fundamentals

- Solid phase reduction of iron and chromium in the crystal lattice of ferrichrompikotit
K.T. Akhmetov, V.E. Roshchin 527
- Evaluation of gaseous dynamic behavior of raw materials and charge for HC ferrochrome production
Zh. Nurmukhanbetov, O.Privalov, L.Prokopyev 535
- The influence of CaCO₃ addition and clay binder selection on electricity efficiency and other operational aspects during pre-reduction of pelletised chromite
J.P. Beukes, B.W. Neizel, E.L.J. Kleynhans, P.G. van Zyl, N.F. Dawson 543

TABLE OF CONTENTS

Volume II:

Manganese Fundamentals

Properties of Nchwaning and Gloria ore in the production of Mn ferroalloys <i>M. Visser, H. Smith, E. Ringdalen, M. Tangstad</i>	553
Effect of CaF_2 on the reduction rate of MnO in $\text{CaO-SiO}_2\text{-MnO}$ slag by SiMn melt <i>Jung Ho Heo, Sung Dae Jeon, Sang Chul Shim, Joo Hyun Park</i>	567
Reducing dephosphorization of Si Mn alloy by CaO-CaF_2 slag and the stability of Ca_3P_2 in slag under atmospheric cooling conditions <i>J. H. Shin, Joo Hyun Park</i>	575
Physicochemical properties of MnO-based slags for the production of manganese ferroalloys <i>Joo Hyun Park</i>	585
Potassium distribution between liquid Mn-Fe-C alloys and $\text{MnO-SiO}_2\text{-CaO}$ slags <i>K. Tang, E. Ringdalen, M. Tangstad, S. Olsen</i>	595
Phase equilibrium thermodynamics in binary systems <i>S. Baisanov</i>	605
Mechanism of carbothermic reduction of Mn oxide powder <i>H. K. Shin, B. D. Lee, H. S. Lee, Young E. Lee</i>	621
Method of complex estimation of manganese raw materials <i>A.V. Zhdanov, V.I. Zhuchkov, V.Ya. Dashevskiy</i>	631
Comparative study of features of partial solid phase metallurgy of manganese by thermal treatment of different types of manganiferous raw materials <i>S. G. Grischenko</i>	637
Manganese alloys production: impact of chemical compositions of raw materials on the energy and materials balance <i>M. Kalenga, P. Xiaowei, M. Tangstad</i>	647
Novel technology to produce ferromanganese alloy from steelmaking slag <i>S.-J. Kim, H. Shibata, S.-Y. Kitamura, K. Yamaguchi</i>	655
Diagram of phase structure of the oxide system $\text{MnO-MgO-CaO-SiO}_2\text{-Al}_2\text{O}_3$ <i>M.Zh. Tolymbekov</i>	665
Corrosion of taphole carbon refractory by $\text{CaO-MnO-SiO}_2\text{-Al}_2\text{O}_3\text{-MgO}$ slag from a SiMn production furnace <i>J.D. Steenkamp, M. Tangstad, P.C. Pistorius, H. Møltnås and J. Muller</i>	669

Other Ferro Alloys Fundamentals

Extraction of iron from Bakal siderite by means of selective reduction in a complex oxide crystal lattice <i>S.P. Salikhov, V.E. Roshchin, A.V. Roshchin</i>	677
Selective extraction of metals from complex ores <i>V.E. Roshchin, A.V. Roshchin</i>	685
Characterization and reduction of high-silicon ironstone ore by CO gas <i>S. Maroufi, G.Ciezki, M.Tangstad, S.Jahanshahi, O.Ostrovski</i>	695
Carbothermal reduction of high-silicon ironstone ore <i>S.Maroufi, G.Ciezki, M.Tangstad, S. Jahanshahian, O.Ostrovski</i>	705
The recovery of ferro-nickel from saprolite ores using reduction roasting <i>J. Chen, E. Jak, P. C. Hayes</i>	713
High temperature phase equilibria in nickel-containing oxide and silicate systems relevant to ferro-nickel production <i>J.Chen, V. Prostakova, P.C. Hayes, S.A. Decterov, E. Jak</i>	723
Boron and calcium refining of ferrosilicon by slag treatment <i>L. K. Jakobsson, M. Tangstad</i>	733
Carbothermal reduction of silica in nitrogen and nitrogen -hydrogen mixture <i>X.Wan, G. Zhang, O. Ostrovski, H. Aral</i>	739
Stepwise carbothermal reduction of bauxite ores <i>C. H.Yeh, G. Zhang</i>	749
The main reasons to develop an improved casting process for silicon - new requirements for working environment, increased post taphole yield and product quality <i>M. F. Møll, K. H. Berget, E. Myrhaug, M. Onsøien, H. Tveit</i>	759
Phase diagram structure of the system Cr-Fe-Al and Cr-Fe-Si <i>Ye. Shabanov, S. Baisanov, A. Chekimbaev, D. Zhaksylykov</i>	769
Theoretical and practical aspects of smelting new complex alloy - aluminosilicomanganese with calcium <i>A.Baisanov, A. Kopabaev, S. Baisanov, M. Tolymbekov, M. Dzhundibaev</i>	775
Self-propagating high-temperature synthesis of ferrosilico titanium <i>K. R. Shaymardanov, I. M. Shatokhin, I. R. Manashev</i>	781
Optimization of physicochemical characteristics of chromium ferro-alloys <i>V.I. Zhuchkov, N.A. Andreev, R.I. Gulyaeva</i>	787
A new process to produce 300 series stainless steel with electro-silicothermic method <i>C. Peixian, C. Shaojun, W. Haijuan</i>	791

Modeling and Simulation

Mathematical model for fast computation of erosion profile in submerged arc furnace with freeze lining <i>D. Hu, S. Chu</i>	799
Process optimization model for FeMn and SiMn production <i>E. Jipnang, P. Monheim, H. Oterdoom</i>	810
Computational modelling of submerged-arc furnace burden behaviour <i>Q.G. Reynolds, K. Bisaka</i>	881
Evaporation of silicon as the basis for its sublimation purification <i>V.P. Malyshev, N.S. Bekturganov, A.M. Turdukozhayeva, M.Zh. Tolymbekov, S.V. Kim</i>	833
Water model study on mixing time in shaking ladle <i>N. Shanqiang, C. Shaojun, Zh. Jun, L. Zhongsi</i>	847
Pre-reduction of ilmenite with natural gas – model development and use <i>S. Lobo, L. Kolbeinsen, S. Seim</i>	857
Numerical model of two-phase flow in Creusot-Loire Uddeholm (CLU) converter <i>T. Nyashanu, G. Akdogan, R.H. Eric, P. Taskinen</i>	869
Online gas characterization by advanced spectrometry <i>T.A. Aarhaug, A. Ferber, O. Kjos, B. Wittgens</i>	883
Andalusite as slag conditioner in ferrochrome production: A case study in techno-economic modelling <i>M.W. Erwee</i>	893

ENERGY and ENVIRONMENT

Energy

Process Modelling and testing methods for evaluating ferroalloy furnace off-gas waste energy <i>L. Els, N. Andrew, S. Noakes</i>	899
Ferroalloy off-gas system waste energy recovery: options and applications <i>L. Els, N. Andrew, T. Johannes, S. Noakes, J. Wingard</i>	909
Energy mapping of industrial ferroalloy plants <i>Y. Ladam, M. Tangstad, B. Ravary</i>	919
Opportunities to reduce carbon foot print in HCF _e Cr production process in a submerged arc furnace <i>L. Samaradivakera, G. P. Sahu</i>	925
Ecoplants technologies – ecologic and economic solutions for the ferroalloy industry <i>C. Fröhling, R. Degel, M. Babel</i>	937

Environment

Fume characterization in the ferroalloy industry <i>I.Kero, M.Næss, G. Tranell</i>	945
Experimental study of rate of silica fume formation from active oxidation of liquid silicon <i>M. K. Næss, N. Smith, G. Tranell, J. E. Olsen</i>	957
Analysis of a ferromanganese secondary fume extraction system to improve design methodologies <i>L. Els, P. Cowx, R. Nordhagen, G. Kornelius, N. Andrew, P. Smith, S. Rencken</i>	967
China's environmental targets for sustainable growth and the technological challenges for the ferroalloys industry <i>M. Louhi, P. Tang</i>	979
Design of secondary fume capturing hood for casting hall of a SiMn production plant <i>M. Kadkhodabeigi, D. Haaland</i>	989
Development of a CFD Model for improvement of an interior environment in metallurgical industries: modeling <i>B. Panjwani, H. Midtdal, B. Ravary, M. Kadkodabeigi, R. Nordhagen</i>	999
Challenges in rendering CO-rich gas from submerged arc furnaces sufficiently clean for CO-generation application <i>J. Vehviläinen</i>	1009
Guidelines for sizing baghouse filters used for ferroalloy and silicon metal furnace applications <i>F. D. Fereday, L. Raath, B. de Montard</i>	1015
Progress in recycling sludge from off-gas cleaning of manganese alloy furnaces <i>B. Ravary, L. Hunsbedt, O. Kristensen</i>	1023
NO _x -emissions from the silicon process comparing wet and dry raw materials pilot scale experiment <i>I. Solheim, N. E. Kamfjord</i>	1029
Hot gas cleaning of furnace off-gases <i>P.J.Jonker</i>	1037

Recycling

The recovery of manganese and generation of a valuable residue from ferromanganese slags by a hydrometallurgical route <i>D. R. Groot, D. M. Kazadi, H. Pöllmann, J. PR de Villiers, T. Redtmann, J. Steenkamp</i>	1051
Metallurgical silicon from high purity sand - critical issues and potential development <i>L. Parous, V.D. de Oliveira</i>	1061

Wastes of the ferroalloy production are raw materials for the chemical branch of industry
S.M. Isabaev, Kh.M. Kuzgibekova, E.V. Zhinova, T.A.Zikanova 1069

COMMERCIAL ASPECTS

Markets

Establishment of innovative production and renovation of in-progress production as basis
for strategic positioning of TNC KAZCHROME JSC on global chromium alloys market
(PLENARY)
V. Til, O. Privalov, M. Kospanov, A. Razin, N. Nurgali, Zh. Musabekov 1077

Applications and Uses

On the role of ferroalloys in steelmaking (PLENARY)
L.Holappa, S.Louhenkilpi 1083
